

I6405BK UV PORTABLE MAGNIFIER

Model # 16405BK UV Portable Magnifier

Perfect for inspection of conformal coatings. Coatings glow brilliantly under UV black illumination, especially when magnified through a five-diopter (2.25X) optical-quality glass lens. Perfect for inspection of welds, solder joints, flux residues and hairline stress cracks. Additional applications include inspection of surfaces and finishes in fields such as criminology, museum and artwork restorations, document authenticity, leak detection, currency verification and gemstone and mineral inspection. Wide rectangular 4" x 2.5" viewing area. Color: Black

- 5-Diopter (2.25X)
- 13W UV-A black bulb
- Protective lens cover
- Lighter weight than comparable units
- Wide rectangular viewing area (4" x 2.5")
- 10' cord with plug-in ballast
- Ideal for inspection of conformal coatings
- Color: Black
